

The formal title for this project is ***Connecting Women in Helmets with Careers in Hardhats.*** This opportunity consists of connecting female veterans and National Guard members with high paying jobs in the building and construction trades in Connecticut. Women will be recruited for this non-traditional field of work and provided a support network to insure success in the ***Apprenticeship Programs, the other four year degree***.

We are very grateful to the ***William and Alice Mortensen Foundation*** for their belief in this very worthwhile program. We have also applied to the US Department of Labor Veterans Division for funding of this project.

If you know a returning female vet, or a female member of the National Guard who is interested in this type of career, please have them contact Jackie Slamon at 860-612-2780 for further information.
